(54) Title: METHOD OF PRODUCING BACULOVIRUS

(57) Abstract: The present invention is directed to a method for producing commercial quantities of Baculovirus using a combi-
nation of methods involving producing occlusion bodies with infectious baculovirus in caterpillar larvae and large numbers of viral
particles with serial passages in cell culture. A two step method was developed by initially producing infectious virus in caterpillar
larvae and then using the resultant infectious virus as an inoculum for a limited number of serial passages in cell culture so to produce
large amounts of infectious baculovirus.
